

INDIANA EUGENICS: HISTORY AND LEGACY, 1907-2007

A hundred years ago, the Governor of Indiana signed into law a bill passed by the state legislature that is widely regarded as the world's first eugenic sterilization legislation. This law, revised in 1927 to address constitutional issues, provided for the involuntary sterilization of approximately 2,500 of the State's most vulnerable citizens before it was repealed in 1974. To mark the centennial anniversary of this legislation, the following events on Thursday, **April 12, 2007** will provide a forum to reflect on the legacy and relevance of this history to current discussions on reproductive rights, applications of genetic science, and our best intentions to improve the lives of people in our communities.

APRIL 12, 2007
